

## Cables for ABM Level Devices

For **115/230 Vac** use 3 wire unshielded, 22 AWG (7x30), 300V

Example: Belden 9491

For **4mA to 20mA** current output use 1 pair shielded 24 AWG (7x32), 300V

Example: Belden 9501

**NOTE:** Ground one end of the shield

For **Communication RS232 or RS485** use 1 pair shielded 24AWG (7x32), 300V

Example: Belden 9501

**NOTE:** For RS232, connect the shield to pin 4 of the terminal

For **24Vdc plus 4mA to 20mA** use 3 wire shielded, 24AWG (7x32), 300V

Example: Belden 9533
